

PUBLIC NOTICE

The District is undertaking a project with the sewer system and part of this process requires that the community sewer lines all be flushed.

Northern Lites has been contracted to carry out this procedure and will begin systematically flushing the sewer lines for approximately one week.

There is potential that there may be blow-back through the sewer lines into residential/business lines and it is recommended that toilet bowl lids are kept closed.

We apologize for any inconvenience, but this is necessary for the inspection of our sewer lines

For any questions or concerns, please contact:

Scott Hopkins
