

PUBLIC NOTICE

December 14, 2018

Bear River Water Advisory

**This notice applies only to water obtained
directly from the Bear River.**

There has been a truck accident on Highway 37A north of Stewart and it appears that some zinc concentrate may have entered the Bear River.

Northern Health has advised that there is no expected impact on the drinking water supply for the District of Stewart as the wells provide water from an aquifer and not directly from the Bear River.

The public is advised not to use water directly from the Bear River for domestic purposes until further information is known.

The District will provide additional details
as they become available.

**District of Stewart
705 Brightwell Street, Stewart, BC V0T 1W0
Ph: (250) 636-2251**
