

## **DISTRICT OF STEWART**

### **INVITES PARTICIPANTS FOR THE WATER DISTRIBUTION 1 COURSE**

**The District of Stewart has arranged for BC Water & Waste Association to deliver the Water Distribution 1 course in Stewart June 26 – 30, 2017.**

**The WD1 course is the foundation for the  
Environmental Operators Certification Program.**

**Upon completing Water Distribution 1, you will be able to:**

1. Understand and apply water distribution system information/components including federal, provincial and local regulations, water quality, water sources, water storage, valves, hydrants and meters, plan reading, water main construction, and cross connection control.
2. Monitor, evaluate and adjust disinfection in water distribution systems including disinfection through chlorination, hypochlorination, ultraviolet radiation, ozone, chlorine dioxide, etc., sampling requirements and other monitoring.
3. Understand the functions of a variety of equipment including hydrants, meters, pipes, service connections, taps, valves, pumps, and water mains.
4. Understand the maintenance of water mains including types of maintenance and pumps and controls.
5. Understand how to perform certain security, safety and administrative procedures including understanding work site safety, setting up a safety program, electrical safety, chemical safety, confined space entry and safety in excavation, shoring and trenching, etc.

**Course fee: \$819.90 +GST per participant**

**Registration Deadline: June 16, 2017**

**If you have any questions please contact Jennifer Larson  
in person at the District Office – 705 Brightwell St.
